Windows (简简单单)

Total Tools: 30

1. Chris Titus Tech Windows Utility

Tool:	Chris Titus Tech Windows Utility
Category:	System Optimization
Risk:	Safe
Description:	Ultimate Windows debloat and optimization tool. Remove bloatware, optimize settings, install essential apps.
Install:	<code>irm "https://christitus.com/win" iex</code>
Usage:	Usage: Run in PowerShell as Administrator. Select options from the GUI menu.
URL:	https://christitus.com/windows-tool/

2. Windows Debloat Script

Tool:	Windows Debloat Script
Category:	System Optimization
Risk:	Moderate
Description:	Remove pre-installed apps, disable telemetry, optimize Windows performance.
Install:	<code>iwr -useb https://git.io/debloat iex</code>
Usage:	Usage: Run in PowerShell as Administrator. Follow on-screen prompts.
URL:	https://github.com/Sycnex/Windows10Debloater

3. O&O; ShutUp10++

Tool:	O&O; ShutUp10++
Category:	Privacy
Risk:	Safe
Description:	Free antispy tool for Windows 10 and 11. Control what data Windows sends.
Install:	<code>Download from official website and run the portable executable.</code>
Usage:	Usage: Open the application, review each setting, apply recommended settings.
URL:	https://www.oo-software.com/en/shutup10

4. Bulk Crap Uninstaller

Tool:	Bulk Crap Uninstaller
-------	------------------------------

Category: [Uninstaller](#)
Risk: [Safe](#)
Description: Remove large amounts of unwanted programs quickly and thoroughly.
Install: [Download from official website or use winget: winget install BCUninstaller](#)
Usage: **Usage:** Launch the app, scan for programs, select and uninstall.
URL: <https://www.bcuninstaller.com/>

5. SDI (Snappy Driver Installer)

Tool: **SDI (Snappy Driver Installer)**
Category: [Drivers](#)
Risk: [Safe](#)
Description: Install and update drivers for free. No ads, no bundled software.
Install: [Download from official website, extract and run.](#)
Usage: **Usage:** Download driver packs, scan system, select drivers to install.
URL: <https://sdi-tool.org/>

6. Microsoft Activation Scripts (MAS)

Tool: **Microsoft Activation Scripts (MAS)**
Category: [Activation](#)
Risk: [Advanced](#)
Description: Open-source Windows and Office activator.
Install: [irm https://massgrave.dev/get | iex](#)
Usage: **Usage:** Run in PowerShell as Administrator, select activation method.
URL: <https://github.com/massgravel/Microsoft-Activation-Scripts>

7. Chocolatey

Tool: **Chocolatey**
Category: [Package Manager](#)
Risk: [Safe](#)
Description: Package manager for Windows. Install software with one command.
Install:

```
Set-ExecutionPolicy Bypass -Scope Process -Force;  
[System.Net.ServicePointManager]::SecurityProtocol =  
[System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object  
System.Net.WebClient).DownloadString('https://community.chocolatey.org/install.  
ps1'))
```

Usage: **Usage:** Use 'choco install ' to install software.
URL: <https://chocolatey.org/>

8. Winget

Tool:	Winget
Category:	Package Manager
Risk:	Safe
Description:	Official Windows Package Manager by Microsoft.
Install:	Pre-installed on Windows 11. On Windows 10, install from Microsoft Store.
Usage:	Usage: Open CMD/PowerShell, use 'winget install '.
URL:	https://github.com/microsoft/winget-cli

9. HWiNFO

Tool:	HWiNFO
Category:	Hardware
Risk:	Safe
Description:	Comprehensive hardware analysis, monitoring and reporting.
Install:	Download from official website and install.
Usage:	Usage: Run the application to view detailed hardware information.
URL:	https://www.hwinfo.com/

10. HWMonitor

Tool:	HWMonitor
Category:	Hardware
Risk:	Safe
Description:	Hardware monitoring program that reads PC systems health sensors.
Install:	Download from official website and install.
Usage:	Usage: Launch to monitor temperatures, voltages, fan speeds.
URL:	https://www.cpuid.com/softwares/hwmonitor.html

11. CrystalDiskInfo

Tool:	CrystalDiskInfo
Category:	Hardware
Risk:	Safe
Description:	Monitor SSD/HDD health status and temperature.
Install:	Download from official website and install.
Usage:	Usage: Open the app to view disk health status.
URL:	https://crystalmark.info/en/software/crystaldiskinfo/

12. MemTest86

Tool:	MemTest86
Category:	Diagnostics

Risk: Safe

Description: Industry standard for RAM memory testing.

Install: Download, create bootable USB, boot from USB.

Usage: Usage: Boot from USB drive, tests run automatically.

URL: <https://www.memtest86.com/>

13. Rufus

Tool: Rufus

Category: Utilities

Risk: Safe

Description: Create bootable USB drives easily.

Install: Download from official website (portable or installer).

Usage: Usage: Select ISO file, select USB drive, click Start.

URL: <https://rufus.ie/>

14. Ventoy

Tool: Ventoy

Category: Utilities

Risk: Safe

Description: Bootable USB solution. Just copy ISO files to USB.

Install: Download, run Ventoy2Disk.exe to install on USB.

Usage: Usage: Copy ISO files to the Ventoy USB drive, boot from it.

URL: <https://www.ventoy.net/>

15. PowerToys

Tool: PowerToys

Category: Utilities

Risk: Safe

Description: Microsoft power user utilities for Windows.

Install: winget install Microsoft.PowerToys

Usage: Usage: Access via system tray, configure individual tools.

URL: <https://github.com/microsoft/PowerToys>

16. Everything

Tool: Everything

Category: Search

Risk: Safe

Description: Instant file search for Windows. Lightning fast.

Install: [Download from official website or winget install voidtools.Everything](#)
Usage: **Usage:** Open Everything, type filename to search instantly.
URL: <https://www.voidtools.com/>

17. 7-Zip

Tool: **7-Zip**
Category: [Utilities](#)
Risk: [Safe](#)
Description: Free open-source file archiver with high compression ratio.
Install: [winget install 7zip.7zip](#)
Usage: **Usage:** Right-click files/folders to compress or extract.
URL: <https://www.7-zip.org/>

18. Malwarebytes

Tool: **Malwarebytes**
Category: [Security](#)
Risk: [Safe](#)
Description: Anti-malware software for Windows, Mac, and mobile.
Install: [Download from official website and install.](#)
Usage: **Usage:** Run scans to detect and remove malware.
URL: <https://www.malwarebytes.com/>

19. VeraCrypt

Tool: **VeraCrypt**
Category: [Security](#)
Risk: [Safe](#)
Description: Free open-source disk encryption software.
Install: [Download from official website and install.](#)
Usage: **Usage:** Create encrypted containers or encrypt drives.
URL: <https://www.veracrypt.fr/>

20. BleachBit

Tool: **BleachBit**
Category: [Cleanup](#)
Risk: [Moderate](#)
Description: Clean your system and free disk space.
Install: [winget install BleachBit.BleachBit](#)
Usage: **Usage:** Select items to clean, preview, then delete.

URL: <https://www.bleachbit.org/>

21. Geek Uninstaller

Tool: **Geek Uninstaller**
Category: [Uninstaller](#)
Risk: [Safe](#)
Description: Efficient and fast small uninstaller.
Install: [Download portable version from official website.](#)
Usage: **Usage:** Launch, right-click program to uninstall.
URL: <https://geekuninstaller.com/>

22. Tron Script

Tool: **Tron Script**
Category: [System Repair](#)
Risk: [Advanced](#)
Description: Automatic system cleanup and repair script for Windows.
Install: [Download from GitHub, extract, run as Admin.](#)
Usage: **Usage:** Run tron.bat as Administrator, follow prompts.
URL: <https://github.com/bmrf/tron>

23. System File Checker (SFC)

Tool: **System File Checker (SFC)**
Category: [System Repair](#)
Risk: [Safe](#)
Description: Scan and restore corrupted Windows system files.
Install: [sfc /scannow](#)
Usage: **Usage:** Open CMD as Administrator, run 'sfc /scannow'.
URL: <https://learn.microsoft.com/en-us/windows-server/administration/windows-commands/sfc>

24. Disk Check (CHKDSK)

Tool: **Disk Check (CHKDSK)**
Category: [Diagnostics](#)
Risk: [Safe](#)
Description: Check disk for errors and bad sectors.
Install: [chkdsk /r](#)
Usage: **Usage:** Open CMD as Admin, run 'chkdsk C: /r'.

URL: <https://learn.microsoft.com/en-us/windows-server/administration/windows-commands/chkdsk>

25. DISM System Repair

Tool: **DISM System Repair**

Category: [System Repair](#)

Risk: [Safe](#)

Description: Repair Windows image and component store.

Install: `dism.exe /online /cleanup-image /restorehealth`

Usage: **Usage:** Open CMD as Admin, run DISM commands.

URL: <https://learn.microsoft.com/en-us/windows-hardware/manufacture/desktop/dism-operating-system-package-servicing-command-line-options>

26. GPU Driver Uninstaller (DDU)

Tool: **GPU Driver Uninstaller (DDU)**

Category: [Drivers](#)

Risk: [Safe](#)

Description: Display Driver Uninstaller - remove GPU drivers completely.

Install: `Download from official website, extract and run.`

Usage: **Usage:** Run in Safe Mode, select GPU brand, clean and restart.

URL: <https://www.wagnardsoft.com/display-driver-uninstaller-ddu->

27. Windows Update Reset

Tool: **Windows Update Reset**

Category: [System Repair](#)

Risk: [Safe](#)

Description: Reset Windows Update components to fix update issues.

Install: `net stop wuauserv && net stop bits && net stop cryptsvc`

Usage: **Usage:** Run commands in CMD as Administrator.

URL: <https://learn.microsoft.com/en-us/windows/deployment/update/windows-update-resources>

28. DNS Flush & Reset

Tool: **DNS Flush & Reset**

Category: [Network](#)

Risk: [Safe](#)

Description: Flush DNS cache and reset network stack.

Install: `ipconfig /flushdns && ipconfig /registerdns`

Usage: **Usage:** Open CMD as Admin, run the commands.
URL: <https://learn.microsoft.com/en-us/windows-server/administration/windows-commands/ipconfig>

29. Temp File Cleaner

Tool: **Temp File Cleaner**
Category: [Cleanup](#)
Risk: [Safe](#)
Description: Clean all temporary files from Windows.
Install: `del /q/f/s %TEMP%\*`
Usage: **Usage:** Run in CMD to clean temp files.
URL: <https://learn.microsoft.com/en-us/windows-server/administration/windows-commands/del>

30. PowerPlan Switcher

Tool: **PowerPlan Switcher**
Category: [Performance](#)
Risk: [Safe](#)
Description: Switch to High Performance power plan.
Install: `powercfg /setactive 8c5e7fda-e8bf-4a96-9a85-a6e23a8c635c`
Usage: **Usage:** Run in CMD as Administrator.
URL: <https://learn.microsoft.com/en-us/windows-hardware/design/device-experiences/powercfg-command-line-options>

macOS (🍏🍏🍏🍏🍏🍏)

Total Tools: 15

1. AppCleaner

Tool:	AppCleaner
Category:	Uninstaller
Risk:	Safe
Description:	Completely uninstall apps from your Mac.
Install:	Download from freemacsoft.net, drag to Applications.
Usage:	Usage: Drag app to AppCleaner window, click Delete.
URL:	https://freemacsoft.net/appcleaner/

2. Homebrew

Tool:	Homebrew
Category:	Package Manager
Risk:	Safe
Description:	The missing package manager for macOS.
Install:	<pre>/bin/bash -c "\$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"</pre>
Usage:	Usage: Use 'brew install ' to install software.
URL:	https://brew.sh/

3. Onyx

Tool:	Onyx
Category:	System
Risk:	Moderate
Description:	Maintenance and optimization tool for macOS.
Install:	Download from titanium-software.fr, install and run.
Usage:	Usage: Select maintenance tasks, execute.
URL:	https://www.titanium-software.fr/en/onyx.html

4. CleanMyMac X

Tool:	CleanMyMac X
Category:	Cleanup
Risk:	Safe
Description:	All-in-one package to tidy up your Mac.

Install: [Download from cleanmymac.com, install.](#)
Usage: **Usage:** Scan system, review and clean.
URL: <https://cleanmymac.com/>

5. Amphetamine

Tool: **Amphetamine**
Category: [Utilities](#)
Risk: [Safe](#)
Description: Prevent your Mac from sleeping.
Install: [Install from Mac App Store.](#)
Usage: **Usage:** Click menu bar icon to start/stop session.
URL: <https://apps.apple.com/us/app/amphetamine/id937984704>

6. AppTrap

Tool: **AppTrap**
Category: [Uninstaller](#)
Risk: [Safe](#)
Description: Automatically remove associated files when uninstalling.
Install: [Download from onnati.net, install preference pane.](#)
Usage: **Usage:** Enable in System Preferences, drag apps to trash.
URL: <https://onnati.net/apptrap/>

7. Tuxera NTFS

Tool: **Tuxera NTFS**
Category: [Utilities](#)
Risk: [Safe](#)
Description: Full read-write access to NTFS drives on Mac.
Install: [Download from tuxera.com, install.](#)
Usage: **Usage:** NTFS drives work automatically after install.
URL: <https://www.tuxera.com/products/tuxera-ntfs-for-mac/>

8. Disk Inventory X

Tool: **Disk Inventory X**
Category: [Storage](#)
Risk: [Safe](#)
Description: Disk usage utility for Mac.
Install: [Download from derlien.com, install.](#)
Usage: **Usage:** Open and select drive to analyze.

URL: <http://www.derlien.com/>

9. EtreCheck

Tool: **EtreCheck**

Category: [Diagnostics](#)

Risk: [Safe](#)

Description: Diagnose and troubleshoot Mac issues.

Install: [Download from etrecheck.com, run.](#)

Usage: **Usage:** Click 'Start Check' to diagnose issues.

URL: <https://etrecheck.com/>

10. Malwarebytes for Mac

Tool: **Malwarebytes for Mac**

Category: [Security](#)

Risk: [Safe](#)

Description: Mac anti-malware protection.

Install: [Download from malwarebytes.com, install.](#)

Usage: **Usage:** Run scans to detect and remove malware.

URL: <https://www.malwarebytes.com/mac/>

11. Little Snitch

Tool: **Little Snitch**

Category: [Security](#)

Risk: [Safe](#)

Description: Monitor and control network connections.

Install: [Download from obdev.at, install.](#)

Usage: **Usage:** Configure rules for app network access.

URL: <https://www.obdev.at/products/littlesnitch/>

12. Carbon Copy Cloner

Tool: **Carbon Copy Cloner**

Category: [Backup](#)

Risk: [Safe](#)

Description: Create bootable backups of your Mac.

Install: [Download from bombich.com, install.](#)

Usage: **Usage:** Select source and destination, clone.

URL: <https://bombich.com/>

13. Stats

Tool: **Stats**
Category: [Monitoring](#)
Risk: [Safe](#)
Description: System monitor in the menu bar.
Install: `brew install --cask stats`
Usage: **Usage:** View system stats in menu bar.
URL: <https://github.com/exelban/stats>

14. Rectangle

Tool: **Rectangle**
Category: [Window Management](#)
Risk: [Safe](#)
Description: Move and resize windows using keyboard shortcuts.
Install: `brew install --cask rectangle`
Usage: **Usage:** Use shortcuts like Ctrl+Option+Arrow to snap windows.
URL: <https://rectangleapp.com/>

15. HiddenBar

Tool: **HiddenBar**
Category: [Utilities](#)
Risk: [Safe](#)
Description: Hide menu bar items to keep it clean.
Install: `brew install --cask hiddenbar`
Usage: **Usage:** Drag items to hidden section in menu bar.
URL: <https://github.com/dwarvesf/hidden>

Linux (空空空空空)

Total Tools: 15

1. Ubuntu Cleaner

Tool: Ubuntu Cleaner

Category: Cleanup

Risk: Safe

Description: Clean up your Ubuntu system.

Install: `sudo apt install ubuntu-cleaner`

Usage: **Usage:** Launch from applications, select items to clean.

URL: <https://github.com/gerardpuig/ubuntu-cleaner>

2. Stacer

Tool: Stacer

Category: System

Risk: Safe

Description: Linux system optimizer and monitoring tool.

Install: `sudo apt install stacer`

Usage: **Usage:** Launch Stacer, use dashboard for optimization.

URL: <https://github.com/oguzhaninan/Stacer>

3. BleachBit for Linux

Tool: BleachBit for Linux

Category: Cleanup

Risk: Moderate

Description: Clean your Linux system and free disk space.

Install: `sudo apt install bleachbit`

Usage: **Usage:** Run bleachbit, select items, clean.

URL: <https://www.bleachbit.org/>

4. Timeshift

Tool: Timeshift

Category: Backup

Risk: Safe

Description: System restore tool for Linux.

Install: `sudo apt install timeshift`
Usage: **Usage:** Create and restore system snapshots.
URL: <https://github.com/teejee2008/timeshift>

5. GParted

Tool: **GParted**
Category: [Storage](#)
Risk: [Advanced](#)
Description: Partition editor for graphically managing disk partitions.
Install: `sudo apt install gparted`
Usage: **Usage:** Launch GParted, select disk, modify partitions.
URL: <https://gparted.org/>

6. htop

Tool: **htop**
Category: [Monitoring](#)
Risk: [Safe](#)
Description: Interactive process viewer for Linux.
Install: `sudo apt install htop`
Usage: **Usage:** Run 'htop' in terminal to view processes.
URL: <https://htop.dev/>

7. Neofetch

Tool: **Neofetch**
Category: [Utilities](#)
Risk: [Safe](#)
Description: Display system information in terminal.
Install: `sudo apt install neofetch`
Usage: **Usage:** Run 'neofetch' in terminal.
URL: <https://github.com/dylanaraps/neofetch>

8. Terminator

Tool: **Terminator**
Category: [Terminal](#)
Risk: [Safe](#)
Description: Terminal emulator with multiple terminals in one window.
Install: `sudo apt install terminator`
Usage: **Usage:** Launch Terminator, use Ctrl+Shift+E/O to split.

URL: <https://gnometerminator.blogspot.com/>

9. ClamAV

Tool: **ClamAV**

Category: [Security](#)

Risk: [Safe](#)

Description: Open source antivirus engine for detecting trojans and malware.

Install: `sudo apt install clamav`

Usage: **Usage:** Run 'sudo freshclam' to update, 'clamscan -r /path' to scan.

URL: <https://www.clamav.net/>

10. UFW

Tool: **UFW**

Category: [Security](#)

Risk: [Moderate](#)

Description: Uncomplicated Firewall for managing netfilter.

Install: `sudo apt install ufw`

Usage: **Usage:** sudo ufw enable, sudo ufw allow .

URL: <https://launchpad.net/ufw>

11. GDebi

Tool: **GDebi**

Category: [Package Manager](#)

Risk: [Safe](#)

Description: Install .deb packages with automatic dependency resolution.

Install: `sudo apt install gdebi`

Usage: **Usage:** sudo gdebi package.deb

URL: <https://launchpad.net/gdebi>

12. Synaptic

Tool: **Synaptic**

Category: [Package Manager](#)

Risk: [Safe](#)

Description: Graphical package management tool.

Install: `sudo apt install synaptic`

Usage: **Usage:** Launch Synaptic, search and manage packages.

URL: <https://www.nongnu.org/synaptic/>

13. Hardinfo

Tool: **Hardinfo**

Category: [Diagnostics](#)

Risk: [Safe](#)

Description: System profiler and benchmark tool.

Install: `sudo apt install hardinfo`

Usage: **Usage:** Launch hardinfo to view system info and run benchmarks.

URL: <https://github.com/lpereira/hardinfo>

14. KSysGuard

Tool: **KSysGuard**

Category: [Monitoring](#)

Risk: [Safe](#)

Description: System monitor for KDE Plasma.

Install: `sudo apt install ksysguard`

Usage: **Usage:** Launch from applications to monitor system.

URL: <https://apps.kde.org/ksysguard/>

15. Lutris

Tool: **Lutris**

Category: [Gaming](#)

Risk: [Safe](#)

Description: Open gaming platform for Linux.

Install: `sudo apt install lutris`

Usage: **Usage:** Launch Lutris, install games from library.

URL: <https://lutris.net/>

Android (简简单单简简单单)

Total Tools: 13

1. SD Maid SE

Tool:	SD Maid SE
Category:	Cleanup
Risk:	Safe
Description:	System cleaning tool for Android.
Install:	Download from GitHub or Play Store.
Usage:	Usage: Grant storage access, run scans to clean.
URL:	https://github.com/d4rken-org/sdmaid-se

2. Shizuku

Tool:	Shizuku
Category:	System
Risk:	Moderate
Description:	Use system APIs directly with ADB/root privileges.
Install:	Install from Play Store, enable via ADB.
Usage:	Usage: Enable via wireless debugging, grant apps Shizuku access.
URL:	https://shizuku.rikka.app/

3. App Manager

Tool:	App Manager
Category:	Package Manager
Risk:	Moderate
Description:	Full-featured package manager for Android.
Install:	Download from GitHub or F-Droid.
Usage:	Usage: Grant permissions, manage installed apps.
URL:	https://github.com/MuntashirAkon/AppManager

4. Termux

Tool:	Termux
Category:	Terminal
Risk:	Safe
Description:	Terminal emulator and Linux environment app.

Install: [Install from F-Droid or GitHub.](#)

Usage: **Usage:** Launch Termux, use Linux commands.

URL: <https://termux.com/>

5. ADB AppControl

Tool: **ADB AppControl**

Category: [Management](#)

Risk: [Moderate](#)

Description: Manage Android apps via ADB from PC.

Install: [Download from adbappcontrol.com, run on PC.](#)

Usage: **Usage:** Enable USB debugging, connect device, manage apps.

URL: <https://adbappcontrol.com/>

6. Universal Android Debloater

Tool: **Universal Android Debloater**

Category: [Debloat](#)

Risk: [Moderate](#)

Description: Remove bloatware from any Android device.

Install: [Download from GitHub, enable USB debugging.](#)

Usage: **Usage:** Run on PC with device connected, select packages to remove.

URL: <https://github.com/0x192/universal-android-debloater>

7. Franco Kernel Manager

Tool: **Franco Kernel Manager**

Category: [System](#)

Risk: [Advanced](#)

Description: Kernel manager for rooted devices.

Install: [Install from Play Store \(requires root\).](#)

Usage: **Usage:** Grant root access, manage kernel settings.

URL: <https://play.google.com/store/apps/details?id=com.franco.kernel>

8. Magisk

Tool: **Magisk**

Category: [Root](#)

Risk: [Advanced](#)

Description: Systemless root solution for Android.

Install: [Download APK from GitHub, flash via recovery.](#)

Usage: **Usage:** Install Magisk app, manage modules and root access.

URL: <https://github.com/topjohnwu/Magisk>

9. Greenify

Tool: **Greenify**

Category: [Battery](#)

Risk: [Safe](#)

Description: Hibernation app to save battery.

Install: [Install from Play Store.](#)

Usage: **Usage:** Select apps to hibernate, enable aggressive doze.

URL: <https://play.google.com/store/apps/details?id=com.oasisfeng.greenify>

10. Blokada

Tool: **Blokada**

Category: [Privacy](#)

Risk: [Safe](#)

Description: Free DNS changer and ad blocker for Android.

Install: [Download from blokada.org or Play Store.](#)

Usage: **Usage:** Enable VPN, select DNS provider, block ads.

URL: <https://blokada.org/>

11. NetGuard

Tool: **NetGuard**

Category: [Security](#)

Risk: [Safe](#)

Description: No-root firewall for Android.

Install: [Install from GitHub or Play Store.](#)

Usage: **Usage:** Enable VPN, configure per-app firewall rules.

URL: <https://github.com/M66B/NetGuard>

12. CPU Float

Tool: **CPU Float**

Category: [Monitoring](#)

Risk: [Safe](#)

Description: Monitor CPU, GPU, and RAM usage as overlay.

Install: [Install from Play Store.](#)

Usage: **Usage:** Enable overlay permission, view stats on screen.

URL: <https://play.google.com/store/apps/details?id=com.cgw.cputemp>

13. Amarok

Tool: **Amarok**

Category: [Privacy](#)

Risk: [Safe](#)

Description: Hide apps and files on Android.

Install: [Download from GitHub.](#)

Usage: **Usage:** Select apps/files to hide, toggle visibility.

URL: <https://github.com/deltazefiro/Amarok-Hider>

iOS (📱📱📱📱)

Total Tools: 11

1. AltStore

Tool:	AltStore
Category:	Sideload
Risk:	Safe
Description:	Alternative App Store for iOS - sideload apps.
Install:	Download from altstore.io, install via AltServer.
Usage:	Usage: Connect to PC/Mac, sideload apps via AltStore.
URL:	https://altstore.io/

2. Sideloadly

Tool:	Sideloadly
Category:	Sideload
Risk:	Safe
Description:	Sideload iOS apps without jailbreak.
Install:	Download from sideloadly.io, install on PC.
Usage:	Usage: Connect iOS device, select IPA, start sideload.
URL:	https://sideloadly.io/

3. TrollStore

Tool:	TrollStore
Category:	Sideload
Risk:	Moderate
Description:	Install IPAs permanently on iOS 14-16.
Install:	Install via TrollHelper or TrollInstaller.
Usage:	Usage: Open TrollStore, install IPA files permanently.
URL:	https://github.com/opa334/TrollStore

4. Checkra1n

Tool:	Checkra1n
Category:	Jailbreak
Risk:	Advanced
Description:	Jailbreak for iPhone 5s through iPhone X.

Install: [Download from checkra.in, create bootable USB.](#)
Usage: **Usage:** Boot into DFU mode, run checkra1n.
URL: <https://checkra.in/>

5. Unc0ver

Tool: **Unc0ver**
Category: [Jailbreak](#)
Risk: [Advanced](#)
Description: Jailbreak for iOS 11.0-14.3.
Install: [Sideload IPA via AltStore or Sideloadly.](#)
Usage: **Usage:** Open unc0ver app, tap 'Jailbreak'.
URL: <https://unc0ver.dev/>

6. Dopamine

Tool: **Dopamine**
Category: [Jailbreak](#)
Risk: [Advanced](#)
Description: Jailbreak for iOS 15.0-16.6.1.
Install: [Sideload via TrollStore or AltStore.](#)
Usage: **Usage:** Open Dopamine, tap 'Jailbreak'.
URL: <https://github.com/opa334/Dopamine>

7. iMazing

Tool: **iMazing**
Category: [Management](#)
Risk: [Safe](#)
Description: iOS device management tool for Mac and PC.
Install: [Download from imazing.com, install.](#)
Usage: **Usage:** Connect device, manage backups, transfers, apps.
URL: <https://imazing.com/>

8. 3uTools

Tool: **3uTools**
Category: [Management](#)
Risk: [Safe](#)
Description: All-in-one tool for iOS devices.
Install: [Download from 3u.com, install on Windows.](#)
Usage: **Usage:** Connect device, use various management features.

URL: <https://www.3u.com/>

9. Odysseyn1x

Tool: **Odysseyn1x**

Category: [Jailbreak](#)

Risk: **Advanced**

Description: Linux-based checkra1n jailbreak live USB.

Install: **Flash ISO to USB, boot from USB.**

Usage: **Usage:** Boot from USB, run checkra1n.

URL: <https://github.com/raspberry-pi-flutter/odysseyn1x>

10. iOS Repo Updater

Tool: **iOS Repo Updater**
