Part 1: Windows Tools (40 Tools)

System optimization, repair, security, and utility tools for Windows 10/11

Chris Titus Tech Windows Utility (Rating: 5.0/5)

Category: [System Optimization](#) | Risk: [SAFE](#) | Downloads: [2M+](#)

Ultimate Windows debloat and optimization tool. Remove bloatware, optimize settings, install essential apps.

Installation:

```
PowerShell: irm "https://christitus.com/win" | iex
```

Usage: Run in PowerShell as Administrator. A GUI will open with various options for debloating, tweaking, and installing apps. Select the options you want and click Apply.

Windows Optimizer Script (Rating: 4.9/5)

Category: [System Optimization](#) | Risk: [SAFE](#) | Downloads: [1M+](#)

Comprehensive Windows 10/11 optimization script. Disables telemetry, removes bloatware, improves performance.

Installation:

```
PowerShell: irm "https://christitus.com/win" | iex
```

Usage: Run in PowerShell as Admin. Follow the on-screen menu to select optimization options.

Windows Debloat Script (Rating: 4.8/5)

Category: [System Optimization](#) | Risk: [MODERATE](#) | Downloads: [1.5M+](#)

Remove pre-installed apps, disable telemetry, optimize Windows performance.

Installation:

```
PowerShell: iwr -useb https://git.io/debloat | iex
```

Usage: Run in PowerShell as Administrator. The script will present options for removing bloatware and disabling telemetry.

O&O; ShutUp10++ (Rating: 4.9/5)

Category: [Privacy](#) | Risk: [SAFE](#) | Downloads: [3M+](#)

Free antispies tool for Windows 10 and 11. Control what data Windows sends to Microsoft.

Installation:

Download from oo-software.com, run the portable executable.

Usage: Open the application, review each privacy setting, apply recommended or custom settings to disable telemetry.

Bulk Crap Uninstaller (Rating: 4.7/5)

Category: [Uninstaller](#) | Risk: [SAFE](#) | Downloads: [2M+](#)

Remove large amounts of unwanted programs quickly and thoroughly.

Installation:

```
winget install BCUninstaller OR download from bcuninstaller.com
```

Usage: Launch the app, let it scan for programs, select multiple programs, and uninstall them in batch.

SDI (Snappy Driver Installer) (Rating: 4.6/5)

Category: Drivers | Risk: SAFE | Downloads: 5M+

Install and update drivers for free. No ads, no bundled software.

Installation:

Download from sdi-tool.org, extract and run.

Usage: Download driver packs via the app, scan your system, select drivers to install, and click Install.

Microsoft Activation Scripts (MAS) (Rating: 4.9/5)

Category: Activation | Risk: ADVANCED | Downloads: 10M+

Open-source Windows and Office activator using HWID/KMS methods.

Installation:

PowerShell: `irm https://massgrave.dev/get | iex`

Usage: Run in PowerShell as Admin, select activation method (HWID for permanent, KMS for renewal), follow prompts.

Chocolatey (Rating: 4.8/5)

Category: Package Manager | Risk: SAFE | Downloads: 8M+

Package manager for Windows. Install software with one command.

Installation:

PowerShell: `Set-ExecutionPolicy Bypass -Scope Process -Force;`
`[System.Net.ServicePointManager]::SecurityProtocol = [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object System.Net.WebClient).DownloadString('https://community.chocolatey.org/install.ps1'))`

Usage: Use 'choco install ' to install software. Example: `choco install firefox`, `choco install vscode`

Winget (Rating: 4.5/5)

Category: [Package Manager](#) | Risk: [SAFE](#) | Downloads: 50M+

Official Windows Package Manager by Microsoft.

Installation:

Pre-installed on Windows 11. Windows 10: Install from Microsoft Store or via Windows Update.

Usage: Open CMD/PowerShell and use: winget search , winget install , winget update --all

HWiNFO (Rating: 4.8/5)

Category: [Hardware](#) | Risk: [SAFE](#) | Downloads: 4M+

Comprehensive hardware analysis, monitoring and reporting tool.

Installation:

Download from [hwiinfo.com](#), install or run portable version.

Usage: Run the application to see detailed hardware info, sensors, and monitoring. Use logging for long-term monitoring.

HWMonitor (Rating: 4.6/5)

Category: [Hardware](#) | Risk: [SAFE](#) | Downloads: 3M+

Hardware monitoring program that reads PC health sensors (temps, voltages, fans).

Installation:

Download from [cpuid.com](#), install and run.

Usage: Launch to monitor CPU/GPU temperatures, voltages, fan speeds in real-time.

CrystalDiskInfo (Rating: 4.7/5)

Category: [Hardware](#) | Risk: [SAFE](#) | Downloads: 6M+

Monitor SSD/HDD health status, temperature, and S.M.A.R.T. attributes.

Installation:

Download from [crystalmark.info](#), install or run portable.

Usage: Open the app to view disk health status (Good/Caution/Bad) and detailed S.M.A.R.T. data.

MemTest86 (Rating: 4.9/5)

Category: [Diagnostics](#) | Risk: [SAFE](#) | Downloads: 4M+

Industry standard for RAM memory testing. Boots from USB.

Installation:

Download from [memtest86.com](#), create bootable USB using Rufus.

Usage: Boot from the USB drive. Tests run automatically. Let it complete at least 4 passes for reliable results.

Rufus (Rating: 4.9/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: 20M+

Create bootable USB drives from ISO files easily and quickly.

Installation:

Download from [rufus.ie](#) (portable or installer).

Usage: Insert USB, select ISO file, select USB drive, configure options, click Start.

Ventoy (Rating: 4.8/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: 8M+

Bootable USB solution. Just copy ISO files to USB - no need to reformat.

Installation:

Download from ventoy.net, run `Ventoy2Disk.exe` to install on USB.

Usage: After installing Ventoy on USB, simply copy ISO files to the USB drive. Boot from USB and select ISO from menu.

PowerToys (Rating: 4.7/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: [15M+](#)

Microsoft power user utilities: FancyZones, PowerRename, Shortcut Guide, etc.

Installation:

`winget install Microsoft.PowerToys` OR [Microsoft Store](#)

Usage: Access via system tray. Enable/disable individual tools. FancyZones for window management, PowerRename for batch renaming.

Everything (Rating: 4.9/5)

Category: [Search](#) | Risk: [SAFE](#) | Downloads: 10M+

Instant file search for Windows. Lightning fast indexing and search.

Installation:

`winget install voidtools.Everything` OR download from [voidtools.com](#)

Usage: Open Everything, start typing filename. Results appear instantly. Use operators like AND, OR, NOT for advanced search.

7-Zip (Rating: 4.9/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: 50M+

Free open-source file archiver with high compression ratio.

Installation:

`winget install 7zip.7zip` OR download from [7-zip.org](#)

Usage: Right-click files/folders to compress or extract. Supports 7z, ZIP, RAR, TAR, and many more formats.

Malwarebytes (Rating: 4.6/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: 25M+

Anti-malware software for Windows, Mac, and mobile.

Installation:

Download from [malwarebytes.com](#), install and run.

Usage: Run a scan to detect malware. Use real-time protection (Premium) for ongoing protection.

VeraCrypt (Rating: 4.8/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: 5M+

Free open-source disk encryption software. Successor to TrueCrypt.

Installation:

Download from [veracrypt.fr](#), install and run.

Usage: Create encrypted file containers or encrypt entire partitions/drives. Use strong passwords.

BleachBit (Rating: 4.5/5)

Category: [Cleanup](#) | Risk: [MODERATE](#) | Downloads: 8M+

Clean your system and free disk space. Similar to CCleaner but open source.

Installation:

`winget install BleachBit.BleachBit` OR download from [bleachbit.org](#)

Usage: Select items to clean (cache, temp files, etc.), preview, then delete. Be careful with application data.

Geek Uninstaller (Rating: 4.6/5)

Category: [Uninstaller](#) | Risk: [SAFE](#) | Downloads: 3M+

Efficient and fast small uninstaller. Portable, no installation needed.

Installation:

Download portable version from [geekuninstaller.com](#)

Usage: Launch, find program in list, right-click to uninstall or force uninstall.

Tron Script (Rating: 4.4/5)

Category: System Repair | Risk: ADVANCED | Downloads: 2M+

Automatic system cleanup and repair script for Windows. Comprehensive repair tool.

Installation:

Download from github.com/bmrf/tron, extract, run as Admin.

Usage: Run tron.bat as Administrator. Script runs through multiple cleanup and repair stages automatically.

System File Checker (SFC) (Rating: 5.0/5)

Category: System Repair | Risk: SAFE | Downloads: 50M+

Scan and restore corrupted Windows system files. Built-in Windows tool.

Installation:

Built-in Windows command. No installation needed.

Usage: Open Command Prompt as Administrator, run: sfc /scannow. Wait for scan to complete and follow instructions.

Disk Check (CHKDSK) (Rating: 4.9/5)

Category: [Diagnostics](#) | Risk: [SAFE](#) | Downloads: [30M+](#)

Check disk for errors and bad sectors. Repairs file system issues.

Installation:

Built-in Windows command. No installation needed.

Usage: Open CMD as Admin: `chkdsk C: /r` (replace C: with desired drive). May require restart for system drive.

DISM System Repair (Rating: 4.8/5)

Category: [System Repair](#) | Risk: [SAFE](#) | Downloads: [20M+](#)

Repair Windows image and component store. Fixes Windows Update issues.

Installation:

Built-in Windows command. No installation needed.

Usage: CMD as Admin: `dism.exe /online /cleanup-image /restorehealth`. Then: `dism.exe /online /cleanup-image /startcomponentcleanup`

Windows Server Setup (Rating: 4.5/5)

Category: [System Setup](#) | Risk: [ADVANCED](#) | Downloads: [1M+](#)

Convert Windows 11 to Windows Server edition. Advanced setup tool.

Installation:

Requires Windows 11 installation media and specific setup files.

Usage: Advanced: Run `setup.exe` with `/product server` switch. Requires specific Windows build.

Windows Activation (MAS) (Rating: 5.0/5)

Category: [Activation](#) | Risk: [ADVANCED](#) | Downloads: [15M+](#)

Open-source Windows and Office activator. HWID and KMS activation methods.

Installation:

PowerShell: `irm https://get.activated.win | iex`

Usage: Run as Admin in PowerShell. Select activation type: HWID (permanent), Ohook (Office), KMS (renewal).

RaphiRe Debloat (Rating: 4.9/5)

Category: [System Optimization](#) | Risk: [SAFE](#) | Downloads: [500K+](#)

Modern Windows debloat tool. Clean, fast, and effective for Windows 10/11.

Installation:

PowerShell: `& ([scriptblock]::Create((irm "https://debloat.raphi.re/")))`

Usage: Run in PowerShell as Admin. Select options to debloat, remove bloatware, and optimize Windows.

Chris Titus Dev Tool (Rating: 4.9/5)

Category: [System Optimization](#) | Risk: [SAFE](#) | Downloads: [3M+](#)

Windows Dev utility for advanced system management and tweaks.

Installation:

PowerShell: `irm "https://christitus.com/windev" | iex`

Usage: Run as Admin. Access developer-focused tools, advanced tweaks, and system configurations.

Windows Update Reset (Rating: 4.8/5)

Category: System Repair | Risk: SAFE | Downloads: 10M+

Reset Windows Update components to fix update issues.

Installation:

Built-in commands. No installation needed.

Usage: CMD as Admin: net stop wuauerv && net stop bits && net stop cryptsvc, then rename folders, then start services.

DNS Flush & Reset (Rating: 4.9/5)

Category: Network | Risk: SAFE | Downloads: 20M+

Flush DNS cache and reset network stack. Fixes network connectivity issues.

Installation:

Built-in Windows commands.

Usage: CMD as Admin: ipconfig /flushdns && ipconfig /registerdns && ipconfig /release && ipconfig /renew && netsh winsock reset

GPU Driver Uninstaller (DDU) (Rating: 4.9/5)

Category: Drivers | Risk: SAFE | Downloads: 15M+

Display Driver Uninstaller - Completely remove GPU drivers for clean install.

Installation:

Download from wagnardsoft.com, extract and run.

Usage: Best in Safe Mode. Select GPU type (NVIDIA/AMD/Intel), click 'Clean and restart'. Install new drivers after.

NVCleanstall (Rating: 4.7/5)

Category: Drivers | Risk: SAFE | Downloads: 5M+

Custom NVIDIA driver installer. Remove telemetry, install only needed components.

Installation:

Download from techpowerup.com, run the installer.

Usage: Select driver version, customize components to install (remove telemetry, HD audio, etc.), install.

Windows Tweaker (SophiApp) (Rating: 4.8/5)

Category: System Optimization | Risk: SAFE | Downloads: 2M+

Modern Windows 10/11 tweaker with 100+ options. Open source and safe.

Installation:

PowerShell: irm <https://sophia.community/install> | iex

Usage: Run as Admin. Select tweaks from categories: Privacy, System, UWP Apps, etc. Apply selected tweaks.

Glary Utilities (Rating: 4.6/5)

Category: System Optimization | Risk: SAFE | Downloads: 25M+

All-in-one system utilities for PC optimization, repair, and maintenance.

Installation:

Download from glarysoft.com, install and run.

Usage: One-click maintenance for quick cleanup, or use individual tools for specific tasks.

Windows Defender Configurator (Rating: 4.5/5)

Category: Security | Risk: MODERATE | Downloads: 1M+

Configure Windows Defender settings. Enable/disable real-time protection.

Installation:

Download from github.com/AndyFul/ConfigureDefender, run portable executable.

Usage: Select protection level or customize individual Defender settings.

Temp File Cleaner (Rating: 4.7/5)

Category: Cleanup | Risk: SAFE | Downloads: 30M+

Clean all temporary files from Windows. Free up disk space instantly.

Installation:

Built-in Windows commands.

Usage: CMD: del /q/f/s %TEMP%* && del /q/f/s C:\Windows\Temp* OR use Disk Cleanup (cleanmgr)

PowerPlan Switcher (Rating: 4.6/5)

Category: Performance | Risk: SAFE | Downloads: 15M+

Switch to High Performance power plan for maximum system performance.

Installation:

Built-in Windows powercfg command.

Usage: CMD as Admin: powercfg /setactive 8c5e7fda-e8bf-4a96-9a85-a6e23a8c635c (High Performance GUID)

Privazer (Rating: 4.7/5)

Category: Privacy | Risk: MODERATE | Downloads: 8M+

Deep system cleaner that removes traces of your activities permanently.

Installation:

Download from privazer.com, install and run.

Usage: Select areas to clean, choose cleaning level, run scan and clean. Can securely delete files.

Part 2: macOS Tools (15 Tools)

Essential utilities, system tools, and applications for Mac users

AppCleaner (Rating: 4.9/5)

Category: Uninstaller | Risk: SAFE | Downloads: 5M+

Completely uninstall apps from your Mac along with associated files.

Installation:

Download from freemacsoft.net, drag to Applications.

Usage: Drag app to AppCleaner window, it finds related files, click Delete to remove completely.

Homebrew (Rating: 4.9/5)

Category: Package Manager | Risk: SAFE | Downloads: 20M+

The missing package manager for macOS. Install software via command line.

Installation:

Terminal: `/bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"`

Usage: brew install to install, brew uninstall to remove, brew search to find packages.

Onyx (Rating: 4.5/5)

Category: System | Risk: MODERATE | Downloads: 3M+

Maintenance and optimization tool for macOS. Access hidden system settings.

Installation:

Download from titanium-software.fr for your macOS version, install and run.

Usage: Select maintenance tasks, verify disk, clean caches, configure hidden settings. Use with caution.

CleanMyMac X (Rating: 4.4/5)

Category: Cleanup | Risk: SAFE | Downloads: 10M+

All-in-one package to tidy up your Mac. Cleanup, optimization, protection.

Installation:

Download from cleanmymac.com, install (paid with free trial).

Usage: Scan system, review items to clean, click Clean. Also has optimization and malware removal features.

Amphetamine (Rating: 4.8/5)

Category: Utilities | Risk: SAFE | Downloads: 2M+

Prevent your Mac from sleeping. Keep system awake for downloads, tasks.

Installation:

Install from Mac App Store.

Usage: Click menu bar icon to start session. Set duration or trigger-based conditions to keep Mac awake.

AppTrap (Rating: 4.3/5)

Category: Uninstaller | Risk: SAFE | Downloads: 500K+

Automatically remove associated files when uninstalling apps.

Installation:

[Download from onnati.net](#), install as preference pane.

Usage: Enable in System Preferences. When you drag apps to trash, it prompts to remove related files.

Tuxera NTFS (Rating: 4.5/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: [2M+](#)

Full read-write access to NTFS drives on Mac.

Installation:

[Download from tuxera.com](#), install (paid with trial).

Usage: After installation, NTFS drives work with full read-write access automatically.

Disk Inventory X (Rating: 4.4/5)

Category: [Storage](#) | Risk: [SAFE](#) | Downloads: [1M+](#)

Disk usage utility for Mac. Visualize what's taking up space.

Installation:

[Download from derlien.com](#), install.

Usage: Open and select drive to analyze. Visual map shows file sizes. Click to navigate folders.

EtreCheck (Rating: 4.7/5)

Category: [Diagnostics](#) | Risk: [SAFE](#) | Downloads: [1M+](#)

Diagnose and troubleshoot Mac issues. Generate system reports.

Installation:

[Download from etrecheck.com](#), run (no installation needed).

Usage: Click 'Start Check' to scan system. Review report for issues, adware, hardware problems.

Malwarebytes for Mac (Rating: 4.5/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: [5M+](#)

Mac anti-malware protection. Scan and remove malware.

Installation:

[Download from malwarebytes.com/mac](#), install.

Usage: Run scan to detect malware. Premium offers real-time protection.

Little Snitch (Rating: 4.8/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: [1M+](#)

Monitor and control network connections. See what apps connect where.

Installation:

[Download from obdev.at](#), install (paid with trial).

Usage: Configure rules for each app's network access. Monitor connections in real-time.

Carbon Copy Cloner (Rating: 4.9/5)

Category: [Backup](#) | Risk: [SAFE](#) | Downloads: [2M+](#)

Create bootable backups of your Mac. Disaster recovery solution.

Installation:

[Download from bombich.com](#), install (paid with trial).

Usage: Select source and destination drive, configure schedule, create bootable backup.

Stats (Rating: 4.8/5)

Category: [Monitoring](#) | Risk: [SAFE](#) | Downloads: 3M+

System monitor in the menu bar. Free and open source.

Installation:

```
brew install --cask stats OR download from GitHub.
```

Usage: Displays CPU, memory, disk, network stats in menu bar. Customizable sensors.

Rectangle (Rating: 4.9/5)

Category: [Window Management](#) | Risk: [SAFE](#) | Downloads: 5M+

Move and resize windows using keyboard shortcuts or snap areas.

Installation:

```
brew install --cask rectangle OR download from rectangleapp.com.
```

Usage: Use shortcuts like Ctrl+Option+Arrow to snap windows. Drag windows to edges for snapping.

HiddenBar (Rating: 4.6/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: 1M+

Hide menu bar items to keep it clean and organized.

Installation:

```
brew install --cask hiddenbar OR download from GitHub.
```

Usage: Drag items between visible and hidden sections. Click the arrow to show/hide hidden items.

Part 3: Linux Tools (15 Tools)

System management, monitoring, and utility tools for Linux distributions

Ubuntu Cleaner (Rating: 4.4/5)

Category: Cleanup | Risk: SAFE | Downloads: 500K+

Clean up your Ubuntu system. Remove cache, old kernels, unused packages.

Installation:

```
sudo apt install ubuntu-cleaner
```

Usage: Launch from applications, select items to clean, click Clean.

Stacer (Rating: 4.7/5)

Category: System | Risk: SAFE | Downloads: 1M+

Linux system optimizer and monitoring tool with modern UI.

Installation:

```
sudo apt install stacer
```

Usage: Dashboard shows system info. Use tabs for cleanup, startup apps, services, uninstaller.

BleachBit for Linux (Rating: 4.5/5)

Category: Cleanup | Risk: MODERATE | Downloads: 2M+

Clean your Linux system and free disk space. Open source.

Installation:

```
sudo apt install bleachbit
```

Usage: Run bleachbit (or sudo bleachbit for system), select items, preview then clean.

Timeshift (Rating: 4.8/5)

Category: Backup | Risk: SAFE | Downloads: 3M+

System restore tool for Linux. Create and restore snapshots.

Installation:

```
sudo apt install timeshift
```

Usage: Configure backup location, create snapshots, restore when needed. Like System Restore in Windows.

GParted (Rating: 4.7/5)

Category: Storage | Risk: ADVANCED | Downloads: 5M+

Partition editor for graphically managing disk partitions.

Installation:

```
sudo apt install gparted
```

Usage: Launch GParted, select disk, create/delete/resize/move partitions. Backup data first!

htop (Rating: 4.9/5)

Category: Monitoring | Risk: SAFE | Downloads: 10M+

Interactive process viewer for Linux. Better than top.

Installation:

```
sudo apt install htop
```

Usage: Run 'htop' in terminal. Use arrow keys to navigate, F6 to sort, F9 to kill processes.

Neofetch (Rating: 4.6/5)

Category: [Utilities](#) | Risk: [SAFE](#) | Downloads: [8M+](#)

Display system information in terminal with ASCII logo.

Installation:

```
sudo apt install neofetch
```

Usage: Run 'neofetch' in terminal. Shows OS, kernel, CPU, GPU, memory, and more.

Terminator (Rating: 4.5/5)

Category: [Terminal](#) | Risk: [SAFE](#) | Downloads: [2M+](#)

Terminal emulator with multiple terminals in one window.

Installation:

```
sudo apt install terminator
```

Usage: Ctrl+Shift+E split vertically, Ctrl+Shift+O split horizontally. Save layouts.

ClamAV (Rating: 4.4/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: [3M+](#)

Open source antivirus engine for detecting trojans and malware.

Installation:

```
sudo apt install clamav clamtk
```

Usage: sudo freshclam to update, clamscan -r /path to scan. Use clamtk for GUI.

UFW (Rating: 4.6/5)

Category: [Security](#) | Risk: [MODERATE](#) | Downloads: [10M+](#)

Uncomplicated Firewall for managing netfilter. Easy firewall setup.

Installation:

```
sudo apt install ufw
```

Usage: sudo ufw enable, sudo ufw allow , sudo ufw status. GUI: sudo apt install gufw

GDebi (Rating: 4.4/5)

Category: [Package Manager](#) | Risk: [SAFE](#) | Downloads: [5M+](#)

Install .deb packages with automatic dependency resolution.

Installation:

```
sudo apt install gdebi
```

Usage: sudo gdebi package.deb OR right-click .deb and open with GDebi.

Synaptic (Rating: 4.6/5)

Category: [Package Manager](#) | Risk: [SAFE](#) | Downloads: [8M+](#)

Graphical package management tool. Advanced apt frontend.

Installation:

```
sudo apt install synaptic
```

Usage: Launch Synaptic, search, install, remove, lock packages. View package details and dependencies.

Hardinfo (Rating: 4.4/5)

Category: [Diagnostics](#) | Risk: [SAFE](#) | Downloads: 1M+

System profiler and benchmark tool.

Installation:

```
sudo apt install hardinfo
```

Usage: Launch hardinfo to view hardware info, run benchmarks, generate reports.

KSysGuard (Rating: 4.3/5)

Category: [Monitoring](#) | Risk: [SAFE](#) | Downloads: 2M+

System monitor for KDE Plasma.

Installation:

```
sudo apt install ksysguard
```

Usage: Launch from applications to monitor CPU, memory, network, processes.

Lutris (Rating: 4.7/5)

Category: [Gaming](#) | Risk: [SAFE](#) | Downloads: 3M+

Open gaming platform for Linux. Manage games from multiple sources.

Installation:

```
sudo apt install lutris OR flatpak install flathub net.lutris.Lutris
```

Usage: Add games, configure Wine/DXVK for Windows games, sync with Steam, Epic, etc.

Part 4: Android Tools (13 Tools)

System management, security, and optimization tools for Android devices

SD Maid SE (Rating: 4.7/5)

Category: Cleanup | Risk: SAFE | Downloads: 5M+

System cleaning tool for Android. Find and clean orphaned files.

Installation:

[Download from GitHub or Play Store.](#)

Usage: Grant storage access, run scans to find and clean cache, corpses, duplicates, and more.

Shizuku (Rating: 4.8/5)

Category: System | Risk: MODERATE | Downloads: 10M+

Use system APIs directly with ADB/root privileges. No root needed.

Installation:

[Install from Play Store. Enable via Wireless Debugging.](#)

Usage: Enable Wireless Debugging in Developer Options, pair with Shizuku, start service. Compatible apps can use elevated permissions.

App Manager (Rating: 4.5/5)

Category: Package Manager | Risk: MODERATE | Downloads: 1M+

Full-featured package manager for Android. Advanced app management.

Installation:

[Download from GitHub or F-Droid.](#)

Usage: View, export, block, disable, uninstall apps. View permissions, trackers, components.

Termux (Rating: 4.8/5)

Category: Terminal | Risk: SAFE | Downloads: 50M+

Terminal emulator and Linux environment app. Run Linux commands.

Installation:

[Install from F-Droid \(recommended\) or GitHub.](#)

Usage: Launch Termux, use Linux commands. Install packages with `pkg install`. Can run Python, Node.js, etc.

ADB AppControl (Rating: 4.6/5)

Category: Management | Risk: MODERATE | Downloads: 2M+

Manage Android apps via ADB from PC. Disable bloatware, backup apps.

Installation:

[Download from adbappcontrol.com, run on PC.](#)

Usage: Enable USB debugging on phone, connect to PC, manage apps via ADB.

Universal Android Debloater (Rating: 4.7/5)

Category: Debloat | Risk: MODERATE | Downloads: 3M+

Remove bloatware from any Android device via PC.

Installation:

Download from [GitHub](#), enable USB debugging on phone.

Usage: Run on PC with phone connected via ADB. Select packages to remove. Has presets for carriers/manufacturers.

Franco Kernel Manager (Rating: 4.6/5)

Category: [System](#) | Risk: [ADVANCED](#) | Downloads: [1M+](#)

Kernel manager for rooted devices. Tune CPU, GPU, I/O settings.

Installation:

Install from [Play Store](#) (requires root).

Usage: Grant root access, adjust CPU frequencies, governor, GPU settings, I/O scheduler.

Magisk (Rating: 4.9/5)

Category: [Root](#) | Risk: [ADVANCED](#) | Downloads: [50M+](#)

Systemless root solution for Android. Root without modifying system partition.

Installation:

Download APK from [GitHub](#), flash via custom recovery or patch boot image.

Usage: Install Magisk app, manage root access, install modules for system modifications.

Greenify (Rating: 4.5/5)

Category: [Battery](#) | Risk: [SAFE](#) | Downloads: [50M+](#)

Hibernation app to save battery. Stop background apps.

Installation:

Install from [Play Store](#).

Usage: Add apps to hibernate list. Works better with ADB/Root. Enable aggressive doze for more battery savings.

Blokada (Rating: 4.7/5)

Category: [Privacy](#) | Risk: [SAFE](#) | Downloads: [10M+](#)

Free DNS changer and ad blocker for Android. System-wide ad blocking.

Installation:

Download from [blokada.org](#) or [Play Store](#) (Lite version).

Usage: Enable VPN, select DNS provider (or use built-in blocklists). Blocks ads system-wide.

NetGuard (Rating: 4.6/5)

Category: [Security](#) | Risk: [SAFE](#) | Downloads: [5M+](#)

No-root firewall for Android. Block internet access per-app.

Installation:

Install from [GitHub](#) or [Play Store](#).
